

VEHICLE MANAGER 2008

Vehicle/Fleet Management Software

Track and Manage:

- Service Schedules
- Service History
- Fuel Usage
- Parts, Vendors
- Expenses

Report On:

- Required Vehicle
- Completed Vehicle
- Overdue and Upcoming Vehicle

Introducing Vehicle Manager

Vehicle Manager is an easy-to-use database for tracking vehicle and maintenance information. The software is easy to set up and a free trial is available for download so you can get started right away.

Each vehicle can be setup with a user defined service schedule, and reminders will pop-up when you open the software to let you know when maintenance is coming up or is past due. Fuel usage may be tracked, and efficiency will be calculated and summarized in reports.

In addition, the reporting section allows you to view and print service reports and save them in many different formats.

www.kzsoftware.com

There are several editions available to meet the different needs from home users as well as large company fleet managers. The Home Edition is designed for home users with up to 10 vehicles, while the Professional and Fleet Editions allow up to 50 and an Unlimited number of vehicles respectively. In addition, the "Fleet Edition with Network Support" allows the database to be shared with multiple users across a network.

Vehicle Manager is competitively priced and used around the world. A free trial version is available on the website and can be set up in minutes so you can try the full functionality of the software.

KAIZEN SOFTWARE SOLUTIONS

Vehicle/Fleet Management Software

How It Works

Vehicles are added to the system and displayed along the left side navigation list, allowing the user to quickly switch the view from one vehicle to another.

Common types of service may be added to the master service item list, and then service schedule templates may be created to allow you to apply complete service schedules to a vehicle all at once, saving time in data entry.

After setting up the service schedules, Vehicle Manager will monitor the schedules and alert you when you open the software if any service is upcoming or overdue.

Current mileage is updated automatically as new Fuel entries are added, or you may update the mileage manually by setting the Odometer reading.

Service Schedules

- Assign service items to be performed based on odometer reading and date (whichever comes first).
- Re-use service templates to save time when configuring new vehicles with an existing schedule.

Service Log

Complete history of Service including:

- Date when the service was completed
- Odometer reading
- Expenses and Parts used
- Notes about the service

Reminders and Status Reports

- Reminders tell you when service is upcoming or overdue
- Reports display and summarize past service as well as scheduled service

Vehicle/Fleet Management Software

Features and Benefits at a Glance

Features:

- Track vehicle service schedules.
- Track completed service and expenses.
- Track fuel usage.
- Track parts, vendors, and drivers.
- Print and email reports in a variety of formats (.pdf, .xls, .html, and more).

Benefits:

- Plan and manage your vehicle's service throughout its useful life.
- Identify vehicles with poor mileage or routinely requiring expensive repairs.
- Report and summarize the data for regulatory or tax requirements.

Vehicle Manager Licensing

Vehicle Manager licenses may be purchased online with a credit card, bank transfer, or a company purchase order. The license key is delivered via email and unlocks the trial limitations.

Vehicle Manager licenses include free minor upgrades for the life of the version and major upgrades for one year. Upgrading is voluntary and not required to continue using the version of the software that has been purchased.

Support by email is available free for both trial and licensed users (see additional support information in the next section).

Kaizen Software Solutions also offers upgrades from one Edition to another for the difference in price, providing a smooth transition as your fleet grows.

Product	Number of vehicles	Price*
Home Edition	Maximum of 10 Vehicles	\$35 USD
Professional Edition	Maximum of 50 Vehicles	\$249 USD
Fleet Edition	Unlimited number of Vehicles	\$349 USD
Fleet Edition with Network Support	Unlimited number of Vehicles	\$699 USD

*Prices in EUR and other currencies based on the exchange rate at the time of purchase.
